PROFESSIONAL SUMMARY

Senior Flutter Developer with **6+ years** of professional experience building and maintaining mobile applications for Android and iOS. Experienced in Flutter and Dart, state management, Firebase services, REST API and third-party SDK integrations, real-time communication, payments, and app-store releases. Currently serving as a Senior Flutter Developer and Team Lead, guiding a team of 3–5 developers and contributing across the mobile delivery lifecycle. Applies Clean Architecture, MVVM, and feature-based architecture, with experience in unit, widget, and integration testing. Uses AI-assisted development tools, including Cursor, GitHub Copilot, and Antigravity, to support efficient development workflows. Also has foundational backend development experience gained while working under senior backend developer supervision with Node.js, Express.js, and MongoDB.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android and iOS application development, responsive UI implementation, localization (LTR/RTL), dynamic theming

Architecture & State Management: Clean Architecture, MVVM, feature-based architecture, Riverpod, Stacked, GetX, Bloc

Backend & APIs: REST APIs, third-party SDK integration; foundational Node.js, Express.js, MongoDB, and basic API development under senior supervision

Firebase: Firebase Authentication, Cloud Firestore, Firebase Analytics, Firebase Cloud Messaging (FCM), OneSignal

Realtime & Media: Firebase/WebSocket chat, Agora audio/video calling and live streaming, Google Maps and location-based services

Payments & Monetization: Stripe, Razorpay, Cashfree and other payment gateway integrations; in-app purchases and subscriptions

Data & Storage: SQLite, Hive, Shared Preferences

Quality & Delivery: Unit, widget and integration testing, GitHub, Jira, CI/CD pipelines, Play Store and App Store publishing

Developer Tools: Cursor, GitHub Copilot, Antigravity, Android Studio, Xcode, Figma, Postman

PROFESSIONAL EXPERIENCE

Senior Flutter Developer / Team Lead | AlgoRepublic | April 2021 – Present

Managed the full mobile application lifecycle from initial client meetings and requirements gathering through architecture, development, team leadership (3–5 developers), testing, and final deployment to Google Play Store and Apple App Store. Led technical decisions, implemented scalable Flutter solutions using Clean Architecture, MVVM, and modern state management, and delivered production-ready apps with integrations for REST APIs, Firebase, payments, real-time communication, and third-party SDKs.

Flutter Developer | IT-Hobbies | February 2020 – March 2021

Developed Flutter mobile applications from UI designs and product requirements, integrated REST APIs and third-party services, resolved defects, and maintained existing features. Collaborated with senior developers on code reviews, testing, debugging, and deployment activities.

BACKEND DEVELOPMENT (Node.js, Express, MongoDB)

- Gained foundational backend development experience while working under senior developer supervision with Node.js, Express.js, and MongoDB.
- Contributed to basic API development and explored authentication, user management, chat, and socket-based communication.
- Worked with Redis caching and BullMQ at a basic level, and developed an introductory understanding of Docker.
